Pioneer DJ CDJ-3000

Quick-Start Guide

Setup

Firmware, setup & connection

The Pioneer DJ CDJ-3000 is a class compliant "Serato Official Accessory", for Mac & Windows, and does not require separate drivers.

Each Pioneer DJ CDJ-3000 media player used with Serato DJ Pro in Internal mode using HID, requires a USB cable, a spare USB port, and must be connected alongside Serato DJ primary hardware.

If you don't have enough USB ports available to you, you may need to connect your CDJ-3000 media players to a powered USB hub. It is important to always connect your Serato DJ primary hardware directly to your computer, where possible.

You must have **firmware version 1.20 or higher** installed on your CDJ-3000 devices, to connect to **Serato DJ Pro version 2.5.7 or higher**.
You can find instructions on how to update the firmware via our **Pioneer DJ CDJ-3000 Firmware update guide**, or via **Pioneer's own website**.

Please also ensure you have the latest version of Serato DJ Pro installed:
**Click here to download Serato DJ Pro**

1. Connect your Serato DJ primary hardware via an available USB port on your computer
2. Open Serato DJ Pro
3. Connect the CDJ-3000 to your computer via an available USB port or USB hub (if required)
4. Press the **SOURCE** button on the CDJ-3000, then press the **Scroll Knob** in
5. Turn the **Scroll Knob** to select a virtual deck to assign the CDJ-3000 to control, then press the **Scroll Knob** in again to confirm
6. Set the respective virtual deck in Serato DJ Pro to INT (Internal) mode
7. Repeat steps 3-6 for any further CDJ-3000 devices you wish to use

Overview

#	CDJ-3000 CONTROL	FUNCTION
1	AUDIO OUT	Connect RCA audio cable
2	AC IN	Connect AC power cable
3	USB	Connect USB cable with PC
